

Analytical Services – Data Profiles (OESC02AS04)

Description

This activity extends the reach and impact of available OpenEMIS data through the development of standardized statistical profiles at the national, sub national or school level. Standardized profiles are particularly useful for planners. The profiles are generally a one or two page summary document displaying education indicators using visual info graphics such as tables, graphs, maps and images.

Purpose(s)

To provide a set of tailored profiles at the national, sub national or school level to be used for analyzing and presenting OpenEMIS data.

Deliverable(s)

1. Standardized profiles at national, sub national or school level, designed in compliance with the client requirements

Duration

The duration of this activity is approximately 18 days.

Location

The location of this activity is offsite.
