Overview

OpenEMIS Monitoring is a web-based application to facilitate the monitoring and evaluation (M&E) of indicators against planned targets. OpenEMIS Monitoring measures deviations from planned activities, objectives, and goals, and can be used as a tool for both formative and summative evaluation.

Benefits

- Define strategic planning frameworks including results, outcomes and outputs
- Track baseline, target and actual performance/financial indicators
- Multiple users can concurrently access monitoring frameworks
- Customize and filter views to show traffic light status over time

Features

- Import external indicator data
- Different levels of security user roles
- Generate reports and export data
- Fully featured Administration Panel
- Multiple languages
- Set data validation rules
- Attach documents including plans

Requirements

- Operating system - Windows
- Webserver – IIS
- Database – SQL Server
- Browser - IE
