## OpenEMIS is an open source Education Management Information System

OpenEMIS has modules to collect, manage, analyze and monitor education data at all levels of the education system. OpenEMIS can be adapted to country-specific and sector-specific contexts, data requirements, and ICT infrastructure.

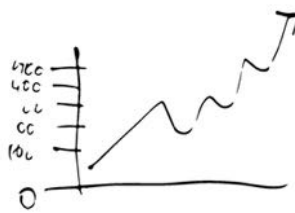

### COLLECT

Collect data on institutions, teachers, and staff. Track students by attendance, behaviour, and achievement.

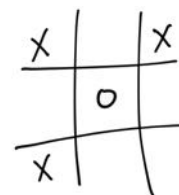

### MANAGE

Generate standard education indicators in a sector-wide data warehouse integrated with civil registration and financial data.

### ANALYZE

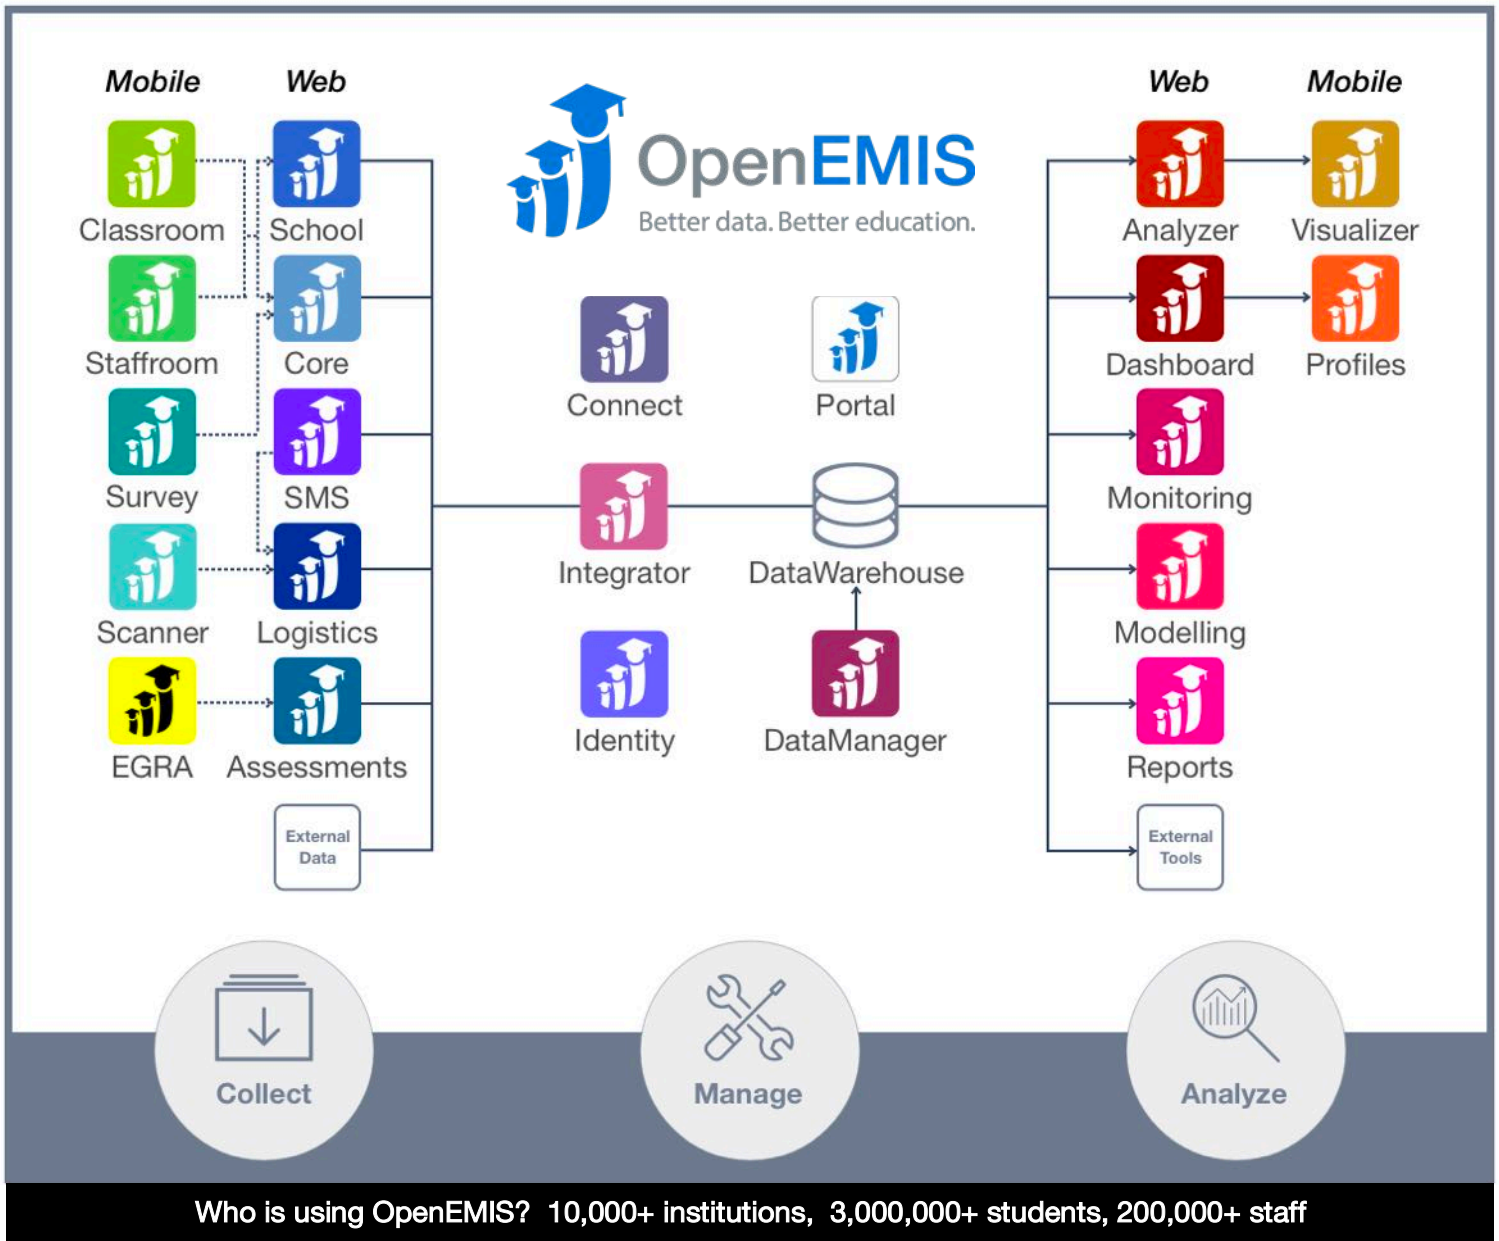

Visualise real-time education data in reports and dashboards at the national, sub-national and school levels using graphs and maps.

### MONITOR

Monitor the national education strategic plan by key performance indicators organized in a results-based management matrix.
