

### Overview

OpenEMIS Census is a sector wide Open Source Education Management Information System (EMIS) that facilitates the collection, processing and management of school census information. OpenEMIS Census transforms the national annual education census (questionnaire) by replacing paper forms with digital forms to rapidly collect data and generate reports.

### Benefits

- ✓ Fully customizable to meet different education requirements
- ✓ Ability to collect data online and offline using paper, excel or a mobile app
- ✓ Will run on most hardware, operating systems, databases and web browsers
- ✓ Comprehensive security architecture to manage access at different levels

### Features

- ✓ The institution module is used to manage the list of institutions and allows schools to login and complete surveys
- ✓ The reports module exports all data in standard and customized reports
- ✓ The administration module is used to configure questionnaires in the system

### Requirements

- ✓ Operating system - Linux, Windows or Macintosh
- ✓ Webserver – Apache / IIS and PHP
- ✓ Database – MySQL, PostgreSQL or SQLServer
- ✓ Browser - IE, Chrome, Firefox or Safari
